* LOTS OF ACTUAL TIPS (SUNLIGHT, RAW MILK, PEROXIDE, ETC
* LOTS OF PROOF AGAINST MAINSTREAM
* DAVID VS. GOLIATH STORY
* PROMISE OF MORE TIPS.
* MISSION.

Start your day with COFFEE and a CIGARETTE?

Sounds insane, right?!

Yep... address skepticism

Well before you give up everything you love in the name of health, see inside for the *real health* facts...

Or else you might never discover how your so-called "vices" may actually SAVE YOUR LIFE!

THE "STRANGE" HOW THE BAD IS GOOD

enemy

Red Meat. Coffee. Fatty Foods. Eggs. Butter and cream. Tobacco. Even sunshine. All the things that make life worth living are things mainstream medicine wants you to give up in the name of good health.

What do they want us to substitute for these delicious, satisfying "vices?" Bean sprouts, tofu this and soy that, gallons of water, and a bunch of joint-destroying, heart-stressing lunacy they call "exercise."

But is this really the right course? Is there really such an overwhelming body of evidence that says we need to be a society of water-intoxicated vegetarian marathoners to be healthy?

NO. There isn't. Mainstream medicine's "sky is falling" philosophy is just so much JUNK MEDICINE.

THE HERO

I've been called medicine's most outspoken MYTH-BUSTER! And now I want to show you how you can ignore the lies and shrug off your medical miseries **IN THE NEXT 60 SECONDS!**

DAVID vs. Goliath story.

- **SAY "NO" TO THE VEGETARIANS** because they actually die younger
- **SLASH ALZHEIMER'S RISK OVERNIGHT...** it couldn't be easier!
- **KEEP CHOLESTEROL LEVELS ABOVE 200** because massive strokes soar when it's lower

what?!?!?

- **GROW YOUR OWN NEW KNEE,** elbow or shoulder with this astonishing real breakthrough
- **WATCH GYM GOERS TURN GREEN WITH ENVY** as you learn to build muscle without exercise

what... fascinating

What if everything you've been told to give up were actually the very things *keeping you alive?*

Guess what: THEY ARE.

My Dear Misled Friend:

That cup of coffee you crave after you shut off the alarm clock is actually one of nature's healthiest miracles. In fact, that first morning mug may pack more health-boosting antioxidants than 3 fresh oranges!

And if you're like me, you enjoy a nice, hot "cuppa joe" throughout the day. So don't fret - indulge, because:

- 2-3 CUPS A DAY may slash your risk of gallstones by 40%
- 4 CUPS could dramatically cut your risk of colon cancer - the third deadliest variety of the disease in America...

And if you do smoke cigarettes (something I'd warn anyone against), keep that coffee pot plugged in – because some research shows that drinking coffee helps prevent smokers from developing bladder cancer.

Of course, as a doctor, I could never condone cigarette smoking. With all the chemicals, additives, and addictive drugs they pack into them, they're to be avoided like the plague...

But notice that I didn't say that smoking tobacco is harmful. Quite the contrary, in fact. The benefits of moderate smoking of pure, unadulterated tobacco (like what's in a fine cigar) have been known for centuries. Good luck finding this out from our friends in the medical mainstream, however.

As far off as it may sound, daily cigar smoking could help anyone:

- Maintain optimum weight and Body Mass Index
- Stay as mentally sharp and alert as possible
- Avoid (and combat) addictions to truly harmful substances
- Prevent Alzheimer's, reduce the risk of Parkinson's - even ease symptoms of schizophrenia

The campaign against tobacco is just one more example of how the mainstream's junk medicine pervades our lives - and forces us into making "healthy" choices that may actually be killing us. Keep reading...

So who am I to be swinging this ax?

I'm *William Campbell Douglass, M.D.*

This needs to come early..

I've been called "the conscience of modern medicine."

But I've also been labeled a "maverick," and several less flattering names too by some of the biggest names in government and the health establishment — but hey, that's part of the territory. And friend, my territory is everywhere...

- I've flown with US Navy crews as a Flight Surgeon...
- Saved lives as a long-time emergency physician...
- Battled malaria in bullet-torn regions of Central America...
- Fought deadly epidemics at my own health clinic in Africa...
- Worked alongside doctors at Russia's renowned Pasteur Institute...
- I've even been called before Congress (they never asked me back)...

THE HERO

And if there's one undeniable medical fact I've learned in 40 years of treating patients all over the world, it's that...

THERE IS NO SUCH THING
as an undeniable medical fact!

As you'll see below, medicine just doesn't work that way. You're not a number, you're a human being. The most unpredictable thing in creation...

But the powers that be — the puffed-up politicos, greedy mega-corporations and profit-obsessed pharmaceutical companies won't have you believe it for a second. They want you to be like a dog on a leash. The minute the dog starts to think for itself and does some exploring, the leash gets jerked back. Pretty soon, the dog stops exploring, content to go where his leader lets him.

Time after time, "Dr. Douglass was right!"

"He was right about BREAST-FEEDING BABIES!"
Nearly 40 years ago, bottle-feeding was at its peak of fashion. Dr. Douglass took on the food companies and argued that it was unhealthy.

"He was right about HYSTERECTOMIES!"
Long before popular women's magazines began warning about this, Dr. Douglass took surgeons to task for bullying women into this drastic and often unnecessary measure.

"He was right about IRON!"
Just this year, The American Journal of Clinical Nutrition started noticing that excess iron ingested through supplements and "enriched" foods is killing many people. Dr. Douglass has been warning of this for more than 15 years.

"He was right about HEART DISEASE!"
Research studies are now pouring out of Universities and medical labs, demonstrating that eggs, fish, meats and other cholesterol-rich foods are wonderfully heart-healthy and not a deadly toxin. They're just catching up to what Dr. Douglass said for 20 years.

"He was right about CANCER!"
In the summer of 2001, brand-new studies show that alternative treatments once spurned by the medical establishment are truly saving lives. Dr. Douglass has championed treatments like these since 1962.

He's been exposing medical conspiracies and pioneering breakthrough treatments for nearly 4 decades. Here's your invitation to join him on the path to real health!

BRAIN CEDEN

SETS UP ENEMY.

That's why I'm writing to you today. When it comes to your health, the leash the big shots want you on is a short one, indeed! They're obscuring the real facts, covering up the truth so they can rob you blind. But it doesn't have to be that way...

Your own road to real health can be easier, cheaper and far more pleasant than any health-nag would ever predict. I guarantee it. And I'll prove it.

Just let me send you 5 FREE BONUS GIFTS – and you'll soon see and feel what I mean. You'll learn how to make your body immune to CANCER, HEART ATTACKS, JOINT PAIN, FLU, COLDS and DEADLY DISEASE in ways that would make our misinformed "health authorities" whine for a week...

By eating REAL FOOD, taking a few (cheap!) supplements that make you STRONGER, and doing some shockingly PLEASURABLE things that "everyone knows" can't be healthy!

First we'll throw out the confusing information purveyed by the "diet Nazis." Here's what I mean:

One of the most-maligned foods on the planet is the All-American hot dog. But that doesn't mean they deserve the bad rap they've been given.

And as it turns out, sodium nitrate (the chemical used to preserve and color hot dogs and other meats) may have a beneficial effect on all the body's organs — heart, brain, lungs, everywhere the blood flows. Sodium nitrate seems to have the ability to guard your cells against hypoxia (lack of oxygen).

Yet, despite these findings, people still have it in for the delicious dogs. Although the Associated Press reported the findings, it still warned "it doesn't mean artery-clogging hot dogs are healthy."

The point I'm trying to make is that it steams me to no end when the media makes sweeping pronouncements about

DR VS. MAINSTREAM MEDICINE

nutrition, usually gleaned by so-called experts like the EPA or the U.S. Department of Agriculture.

The truth is, *good health is a matter of common sense* and having a healthy dose of cynicism about what the "authorities" have to say about what's good for you – and what's not.

If you're like me, you have little tolerance for crap in any area of your life. So why should that be any different when it comes to your health? Just look at my no-nonsense way to:

SLASH YOUR RISK OF ALZHEIMER'S OVERNIGHT

CRAZY! + BENEFITS + DEAR TIPS

It's really easy. Starting tomorrow, drink no tap water. Not because of industrial pollution, but because of chemicals that "health authorities" are *adding* to your water. For example...

People who warned against FLUORIDATION used to be ridiculed, but guess what? In Scandinavia, in fact all of Europe, and nearly every other medically advanced nation, they have now banned the practice.

Know why? Because fluoride makes your body absorb extra aluminum. And where does the*aluminum* go? Your brain. And what metal shows up alarmingly in the brains of Alzheimer's victims? You guessed it. (Hmm... Maybe our health authorities have been drinking too much water?)

In your FREE BONUS REPORTS, I'll explain the cheapest and easiest way to beat the health conspirists at their own game and filter out all this toxic JUNK MEDICINE, along with several even easier ways to cut your Alzheimer's risk. Then you'll learn how to slash your cancer risk by IGNORING some of today's most idiotic advice. Including loads of...

INCREDIBLY FRIGHTENING CANCER MYTHS that you can stop worrying about right now

If you don't want cancer, don't believe anyone who tells you:

- "ELECTRIC BLANKETS GIVE YOU CANCER." Know how this myth got canonized? Instead of commissioning new research, a public health authority put the question to a VOTE. (NEWS FLASH: you can't change the laws of nature by voting.) Yet even these geniuses freely admit that more than 500 existing studies show ZERO compelling evidence of electric fields causing cancer. Rest easy and while you're at it, enjoy your heating pad again.
- "HIGH FAT DIETS CAUSE BREAST CANCER." Fat phobia may be the height of fashion, but it's JUNK MEDICINE. Researchers studied 88,795 women over the course of 14 years, and what did they find? Not one sign that high-fat diets promote breast cancer. And not one hint that low-fat diets protect you.
- "DDT CAUSES CANCER." Says WHO? Check the record. Back in the 1970s, the Environmental Protection Agency examiner summed up 9,000 pages of research by flatly declaring, "*DDT is not a carcinogenic hazard to man.*" He also emphasized that it *doesn't harm fish, birds or other wildlife.* Despite this open-and-shut case, his boss, EPA head William Ruckleshaus went ahead and banned DDT. Aides later said he never read even one page of the studies. He had helped to hatch the DDT scare and couldn't bring himself to admit he was wrong.

The worldwide witch-hunt against DDT hasn't saved one peregrine falcon. But it has unquestionably murdered tens of millions of human children in tropical nations, who continue to die from malaria, Dengue fever, yellow fever and other mosquito-borne plagues.

And speaking of witch hunts, there are other ways the powers that be are trying to control your health. I've made it my mission to help you...

I'm Dr. William Campbell Douglass, and I want to give you a FREE Daily Dose of the straight scoop about health, medicine, and politics.

Join me as I journey far and wide exposing junk medicine, flawed

science, vegetarian propaganda, FDA misinformation, big-government waste and fraud, and the antics of medical miscreants everywhere. With my *Daily Dose*, you'll have the perfect companion to my newsletter – a continuous supply of urgent and timely health information like:

- The latest medical research – *without the PC spin* All the best natural cures – especially the ones *the drug giants want to keep quiet* The truth about diet, nutrition and weight loss – *without the sprouts and tofu*
- What your government has in store for you – and how *your rights are at stake*

All it takes is a second of your time to get yourself 'in the loop' by signing up for this invaluable FREE health resource. And I promise, I won't allow anyone else access to your e-mail address for any reason – I simply have too much respect for the privacy of my readers to allow it. Just fill in the information below and I'll start sending you my *Daily Dose* immediately.

Stay SAFE by STAYING OUT of the vicious drug cycle designed to keep you sick!!

This one is sure to get you hot under the collar. I know it had that effect on me!

In 2004, Merck & Co. withdrew Vioxx, its COX-2 arthritis drug, from the market after a study found it doubled the risk of heart attack and stroke. Since t Then, Merck's Big Pharma buddy, Pfizer, the company has rushed to put out at least four press releases defending the safety of other their COX-2 inhibitors.

In case you're curious, it wasn't caring doctors who wrote these press releases. No, you are being encouraged to

BIG PHARMA

continue taking a dangerous drug by marketers — professionals who are paid to "spin" any story, however controversial, so it comes out smelling like roses. This is science-by-press-release — and it stinks like yesterday's tuna!

It's interesting to note that Pfizer's Bextra is now recognized as a dangerous drug and Merck's Vioxx is off the market for the same reason, but Pfizer's other COX-2 drug, Celebrex is still being sold to trusting patients all over the world.

Remember, folks—if I say it, you can count on it.
That's why your subscription to The Douglass Report comes with my "Ultimate Guarantee". If my advice doesn't help, you won't pay a cent, period. It's that simple — no catch, no deadline, and no further obligation, EVER. Just a 100% refund, right away.

Need more convincing that Big Pharma is not your friend and is run by irresponsible lunatics? The arrogant president of Pfizer defended the COX-2 drugs and said in a television interview that, "there should not be a rush to judgment because of the findings." From where I sit, the "rush to judgment" started with the introduction of these cardio-toxic drugs in the first place!

It truly boggles my mind. Here we are, supposedly the healthiest, wealthiest nation on the planet, and many state health departments continue to churn out a daily flood of lies, half-truths and old wives tales designed to scare us into submission!

Here's another one I'm just itching to tell you about:

"Milk that's not pasteurized is a health hazard"

Really? Let's look at how this myth was spun and how it got poured down the throats of the American public:

If raw *milk* is so bad for us, how did the human race ever survive before *pasteurization*? After all, we've been milking cows and drinking down the creamy, nutrient-rich results for

thousands of years — yet Louis Pasteur's process (which was originally designed to prevent beer spoilage, mind you) has only been in widespread use for a little more than a century. So what gives?

The answer, of course, is that non-pasteurized milk isn't hazardous at all. It's just a lot tougher to regulate and make money from it.

PROOF INTERESTS ARE AGAINST YOU.

Think about it: by legislating against the sale or distribution of raw milk, states force farmers to sell their milk (at a fraction of market value, by the way) to the big milk processors. This creates a "paper trail" on the milk, which can then be used as the basis for collecting tax revenue from those processors — and likely the farmers, too.

And how else could they get away with this kind of shameless money-grubbing except under the guise of a public health concern? It's just one more example of how your healthy, natural dietary options are being sold down the river by a bunch of dollar-crazed bureaucrat shakedown artists.

The good news is that raw milk is healthier and better for you than pasteurized milk in stores. And it tastes better, too.

TIP

Long-time drinkers of vitamin-rich non-pasteurized milk cite increased resistance to colds and flu, weight loss, relief from arthritis pain, plus a whole lot more — and this is not to mention the fuller, truer flavor raw milk drinkers enjoy.

I hope you're starting to see how the facts about good health-backed by centuries of common sense and doing what feels right — have been obscured all in the name of the almighty dollar.

I'm just barely scratching the surface here. I urge you to open your eyes to what's really going on with health in this country. I'll continue to shatter the myths about health that have been sold to you like so much snake oil. As a result...

BENEFITS.

- **You'll work better with your doctor** to find safe, effective treatments for whatever ails you.
- **You'll protect your family's health** by ignoring the health flim-flams that are making them sick.
- **You'll feel better and maybe even live longer** when you take my health advice and finally do what feels right and makes sense.

For example, I already told you that it wasn't bird flu or mysterious airborne bacteria that we all had to worry about, but something much more insidious...

Want to banish HEART DISEASE, CANCER, ARTHRITIS PAIN and more? Then do this right now...

Take all that nagging health advice and TOSS IT IN THE TRASH!

HE'S BEEN CALLED A MAVERICK by vested interests who fear him. But to hundreds of patients and thousands of readers, William Campbell Douglass II, M.D., has long been one of America's most popular myth-busters, revealing the surprisingly inexpensive and easy road to real health.

Decades ago, when it was unfashionable, he started his crusade against drugs that weaken the immune system, surgery that's worse than doing nothing-and punishing diets that cause the very conditions they claim to cure. Now his theories have won thousands of followers in the halls of science, but he's not resting on his laurels. "The wonder," says Dr. Douglass, "is that it took all these new studies to convince doctors of the very facts their patients knew all along."

Patients are constantly being told, 'YOU DON'T KNOW WHAT'S GOOD FOR YOU.' What arrogance! Of course they do!

How else did our ancestors survive?

The fact is that most of us could improve our health immediately by ignoring half of the advice we receive. Real health is often simply a matter of doing what feels sensible.

Today, in dozens of new research studies, health authorities are quietly admitting that Dr. Douglass was right all along. But watch out, health establishment! Dr. Douglass is leading the charge again. He's taking on all the most cherished new falsehoods that make today's

patients miserable...

JUST SAY NO TO THE HEALTH POLICE and feel your miseries fade away

AMERICANS ARE BEING FORCE-FED a diet of vegetables, water and fear. But they've got us worried sick about nothing. Just say no to all the unhealthy advice that's making your life a misery. You'll feel better instantly, live longer and enjoy all your extra years to the fullest."

BE A GOOD PATIENT AND EAT YOUR CHOLESTEROL. For more than 20 years, I've reminded Americans that cholesterol is not a terrifying toxin, but a life-saving nutrient. Your own body makes it when your foods don't provide it. And studies now show that if you're cholesterol-starved, you could raise your risk of massive strokes.

EGG-LOVERS LIVE LONGER. Not only are eggs not guilty of causing heart disease, they've been proven to prevent it. That's right, an enormous study of 120,000 people has shown that egg-eaters have a much lower rate of heart attacks and strokes than egg-avoiders.

THE RAW TRUTH. Go ahead and indulge in steak tartare, and enjoy raw eggs in your mayonnaise and Caesar salad. Raw and rare meat contain life-saving nutrients that overcooking destroys.

WANT TO LIVE LONG AND FEEL STRONG? Tell exercise fanatics to take a hike. To cite just one example, marathon runners drop dead nearly 200 times more often than their lazier (and smarter!) peers. In your FREE BONUS GIFTS, I'll show you how to triple your strength, with an exercise program so easy, even 90-year-olds can do it.

If TV promotes it and everyone knows it, YOU'VE GOT YOURSELF A MYTH

WANT TO TRACK DOWN A MEDICAL MYTH? It's easy! Just follow the money. The more they spend on TV commercials and ads in popular magazines, the more you can be sure the "breakthrough" they're selling is bogus. But profitable.

Over the course of my 30-plus year medical career, I've seen firsthand what works and what doesn't work regarding both conventional and alternative medicine. And I never cease to be shocked and outraged at how government interference, political red tape and corporate profits can keep ordinary people from having access to the information they need to stay healthy. Information like this: DON'T SWALLOW THE SOY PLOY. Soy producers claim it slashes your cancer risk, cuts your heart disease risk and helps with menopause. But actual research says they're wrong on all three counts. What soy will do is pump you full of estrogen-mimicking compounds, which can depress your thyroid and make you put on weight. It also contains an acid that blocks your

absorption of calcium. (Can you say "osteoporosis"?)

IF THE LABEL SAYS "ENRICHED WITH IRON," treat it like a poison. Commercials pound it into our heads that we all have "iron poor blood," but many older Americans are actually getting way too much iron. This is linked to heart disease, cancer and even diabetes. In your FREE BONUS GIFTS, you'll learn how to remove excess iron from your system!

If a cure is safe, effective and cheap WATCH THEM MAKE IT DISAPPEAR

THIS DOLLAR-A-BOTTLE MIRACLE works to clear up colds and flu in 24 hours-and heal many other viral and bacterial diseases as well. It's called HYDROGEN PEROXIDE THERAPY. But it won't make billions for any drug firm because the stuff is practically free. Let me take you behind the scenes, and show you the stunning scientific facts.

AT THE FAMED PASTEUR INSTITUTE in St. Petersburg, Russia, I worked alongside doctors who routinely healed patients of deadly infectious diseases without any antibiotics, using nothing more than the germ-killing power of ultraviolet light. Yet ironically, this life-saving therapy called photoluminescence was perfected here in America, back before World War II! After the discovery of penicillin, it fell out of widespread use. Today, of course, we need it more than ever. But the technology is in the public domain, so it won't make big money for anyone and vested interests are trying to have it banned. Americans need to know the facts and they're all in your FREE BONUS REPORTS.

Corruption is the REAL medical epidemic!

Corruption has become so endemic and intellectual integrity so compromised in pharmaceutical research that drug companies and their collaborators in government (and universities) can now get away with open fraud.

The Journal of the American Medical Association researched the connection between authors of clinical guidelines and the pharmaceutical industry. Over HALF received financial support from the pharmaceutical industry to conduct research. And 38% served as employees or consultants for a pharmaceutical company. Hmm... so how do you suppose they rated the drug?

1
2 pharma - PR
3 STUDIES & FUNDING

PRESENT EVIDENCE

This represents a MASSIVE CON, a criminal fraud perpetrated on you and me, and the American public, engineered behind closed doors by the fake food industry and the pharmaceutical conglomerates. Both have so much money to spread around Washington that they practically OWN Congress, the Food and Drug Administration and the National Institutes of Health. To heck with the public health and welfare – their goal is to get everyone hooked on prescription drugs and manufactured, plastic food.

The saddest fact of all is that the medical profession is falling for it, allowing itself to be manipulated into acting as an *accessory to this crime.* It's terrible!

Health conspiracies are everywhere you look — on TV, in many mainstream newspapers and all over the Internet. Here's another one that really gets my goat:

Attack of the Sun-Haters!

No matter how much evidence has surfaced exonerating the sun from its wrongful status in the mainstream as a carcinogen rivaling dioxin or red dye #2, *some just won't see the light.*

According to an American Academy of Dermatology online article, vitamin supplements alone are all anyone needs for adequate vitamin D intake — and that sun exposure is nothing but harmful and a major cancer risk.

Now, don't get me wrong. I'm a huge fan of vitamin supplementation, even for vitamin D. But of all the vitamins you can take every day, D is probably the least likely to absorb fully and properly into the blood from simple supplementation alone. You NEED sunlight to spur your body's production of it.

If vitamin D is proven to promote health, yet it doesn't effectively express itself in your body from diet and/or supplementation, then how's it helping the people it's helping?

The answer, of course, is sunlight exposure.

Like I've said, the assumptions we've been fed about our health are largely untrue. For example, most people think that women only need healthy estrogen levels to be healthy, but the truth is...

The heart-healthy hormone many women need is TESTOSTERONE

Forget what everyone told you about "male" and "female" hormones. As any first-year medical student should know, both women and men produce all the very same types of sex hormones.

It's just the proportion that's different. Healthy women produce more estrogen and progesterone... men make more testosterone... but all of us need some of each to stay healthy.

Testosterone, not estrogen, is the hormone that keeps your heart strong. If you're a woman over 50, there's a good chance your levels are too low (just as men over 50).

In your FREE BONUS GIFTS I'll give you full details about the NATURAL HORMONE THERAPY that combines all the hormones a woman needs. And how to find a doctor with expertise in this neglected field.

Now what about men? Well, don't let anyone tell you that "MEN HAVE TOO MUCH TESTOSTERONE." Because...

What doctors don't tell you about testosterone isn't just stealing your potency. IT'S KILLING MILLIONS OF MEN EVERY YEAR

Studies show that many American men over 40 actually suffer a dangerous testosterone*deficiency*. Yet doctors typically don't even test for it, because they too are victims of JUNK MEDICINE:

- EVERYONE THINKS that testosterone causes heart disease. Yet the research shows higher levels of testosterone may even prevent strokes.
- EVERYONE FEARS that testosterone promotes prostate disease. Yet studies show that both benign swelling and cancer typically strike older men, with *declining* testosterone levels.
- EVERYONE ASSUMES that the state- of-the-science treatment for impotence is Viagra. While it can help, all-natural testosterone could make you feel and perform like a 21- year-old again. And, a combination of the two... wow!

In your FREE BONUS GIFTS, I'll give you my 60-SECOND SELF TEST for checking your own testosterone levels. And I'll show you several exciting new ways to boost or DOUBLE your own natural testosterone levels quite safely, just by stimulating your body to make more.

Now, let me tell you how to REALLY...
Protect yourself from the world's #1 Killer:

Everyone thinks that today's biggest threats to your life are heart disease and cancer, but surprise...

Germs are back on top again, as a very worried AMA revealed at a conference not long ago.

People who check into hospitals for treatment of other conditions are dying of bacterial pneumonia that antibiotics can't touch. Tuberculosis has returned to America in drug-resistant strains. *New strains of colds* are lasting for months and doctors are publicly worrying that the killer flu which wiped out 20 million people back in 1919 could be reborn any time now...

But cheer up, because despite what everyone tells you...

Antibiotics are not our most powerful weapon against infectious disease

They're just the most profitable for drug companies. Right now, however, we already possess an alternative that can blast all the diseases mentioned above and many more to kingdom come.

It's safe, backed by decades of solid research, and boy is it ever cheap. You can buy it at drugstores everywhere for 65¢ a bottle. So what is this amazing miracle-in-a-bottle?

HYDROGEN PEROXIDE

Go ahead and laugh if you like, but what follows is no joke:

- DID YOU KNOW that your own white blood cells produce hydrogen peroxide? Yes they do. Lots of it.
- KNOW WHY? Because that's how they kill invading germs. It's your body's first and best defense against any infection. Kills bacteria, viruses, yeast, parasites — all the bad guys.
- DON'T BELIEVE ME? Look it up. (Try the Encyclopedia Britannica website. Check the info on "granulocytes." See? I told you so.)

BUT HOW? The hydrogen peroxide molecule (H202) is basically water (H20) with an extra oxygen atom attached. When that oxygen gets released against germs, it "oxidizes" them. Poof, they're goners.

And this shockingly cheap therapy was a real health miracle for my patients in Africa, where the ungodly high cost of drugs condemns millions to death every year.

So how do drug companies get away with selling expensive antibiotics, when we've got this stuff that's nearly free? You'd call me paranoid if I told you. But I'll tell you anyway in your FREE BONUS GIFTS, plus how to find a doctor skilled in this secret miracle.

I'll explain how it's done in your FREE BONUS REPORTS, along with some very nifty "minor" applications. It can be used

topically to clear up sinus infections, erase benign moles and even clear up periodontitis without surgery. No kidding. You'll see.

Getting intrigued? I'm just warming up...

I'd love to brief you on many more JUNK MEDICINE MYTHS to avoid and real health breakthroughs that truly deliver the goods, but I'm out of space. So why not scratch that itch in the back of your mind, sign up for your FREE BONUS GIFTS and find out all about:

- THE FIBER FRAUD. Doctors were getting positively hysterical about your colon. Fiber this, fiber that. Now it appears that some kinds of fiber can trigger *precancerous growths...*
- HOW TO THROW OFF FATIGUE by throwing out your vitamin C pills and taking the world's most un-hyped vitamin instead.
- VITAMIN "O" AND OTHER JOKES that masquerade as alternative medicine. They say you eat this stuff and it floods your body with oxygen. EAT oxygen? You may as well try to breathe food.
- POWER NAPPING FOR FUN AND PROFIT. Napping is fabulous medicine and now you can make it an even more bountiful fountain of health. Winston Churchill, Thomas Edison, Napoleon, JFK and other human dynamos shared this sleepy little secret that can make you smarter, sexier and more productive.

... and there's so much more I'm longing to tell you that will make you stop dreading the word "health" and start feeling fantastic. Just sign up for your 5 FREE BONUS GIFTS now! You'll get full details about all the pointlessly punishing MYTHS and life-transforming REAL BREAKTHROUGHS mentioned above, plus hundreds more.

And, to keep you ahead of the HEALTH NAGS and on top of the best new real health breakthroughs in the months ahead...

YOU'LL GET THE BEST MONEY-SAVING DEAL on my all-you-need-to-save-your-life newsletter, The Douglass Report. Trust me, this is not another of those boring, preachy, you-heard-it-all-before publications that send you to sleep after raking you over the coals...

The Douglass Report IS DIFFERENT. I reveal the ridiculous truth about the latest JUNK MEDICINE MYTHS and hand you amazingly EASY AND PLEASANT new ways to free yourself and your loved ones from pain and disease.

USP... weak

IT'S ALL THE STUFF THAT REALLY WORKS. I name names, give phone numbers, and tell you exactly how to find and use everything. There is absolutely no risk to you. That's what my "Ultimate Guarantee" is all about: Your 100% satisfaction. And remember, along with your one-year or two-year subscription, you'll get the following FREE BONUS GIFTS:

FREE REPORT 1. JUST SAY NO TO JUNK MEDICINE (And Outlive All The Health Nags) Your complete and definitive guide to shrugging off HEART DISEASE... banishing CANCER... beating ARTHRITIS PAIN... improving YOUR MEMORY... and otherwise making your health dreams come true. All by TOTALLY IGNORING the unhealthy low-fat, no-meat, no-milk, eat-only-vegetables MYTHS of modern medicine.

FREE REPORT 2. KILLING CANCER BEFORE IT KILLS YOU AND 8 MORE REAL LIFE CURES. Drug companies are making a fortune by frightening women and men with awful advice that's worse than doing nothing. But here's your complete source for the very real breakthroughs that help cut a woman's cancer risk, strengthen your bones, balance your hormones and make the years ahead the happiest in your life.

And for men... did you know that the leading drug for benign prostate enlargement may increase your risk of prostate cancer? But now you could prevent or reverse benign prostate swelling, fight prostate cancer and protect your potency at the same time, all with no negative side effects.

FREE REPORT 3. 7 "FORBIDDEN" FOODS YOU SHOULD EAT EVERY DAY. Find out how to shake off 14 pounds of waistline and make your arteries healthier too — in as little as TWO WEEKS — by eating like a HUMAN BEING and sculpting your body with real food like steak, eggs and plenty of butter.

FREE REPORT 4. SIX DAYS TO MAXIMUM SEX. Your complete update on the truly effective natural breakthroughs that are bringing men harder, longer-lasting erections — and *helping*women enjoy more intense and frequent orgasms — all in just 6 days or less.

It's time you stopped being led astray by health organizations that don't have your best interests at heart. You're smarter than they are. Will you please let me put the power of all these real health breakthroughs into your hands right now?

Don't let self-righteous health sadists feed you any more lies... just give your body what it's begging for!

The road to real health means making your own choices and not just accepting what the health establishment says you "should" do. It's been my mission to expose the hypocrisy that's running rampant in today's health system. If you follow my advice, I promise you'll notice illness, pain and weakness fade away like a bad dream. You'll see!

Mission

It's always been nature's way and it's today's REAL cutting-edge in modern medicine.

Doesn't this easy new road to real health make more sense than BEATING YOURSELF UP FOR NOTHING?

Of course it does! So please, sign up today...

It saves you up to $37 on your risk-free subscription...

It brings you all the FREE BONUS GIFTS I've mentioned that will let you turn the tables on medicine's misinformed know-it-alls...

Plus you have my "Ultimate Guarantee" that your gifts and my newsletter will deliver all you're hoping for and more. Or else please, feel free to call off the deal — at any time for a complete refund — no questions asked. YOU KEEP YOUR FREE BONUS GIFTS.

Don't wait. Do it now!

Get your FREE Bonus Gifts and reclaim your health...

Walk away from the health lies and into the sunlight...

And find out how sweet it feels to savor real health!

Sincerely,

William Campbell Douglass II, M.D.
Editor

P.S. I saved my favorite gift for last. Sign up now and you'll get the valuable FREE Extra Bonus Report,

TODAY'S BEST MEDICAL MIRACLES FROM THE UNDERGROUND. Here I share the secrets about today's two most effective therapies that NOBODY ever told you about. They kill cold, flu and pneumonia viruses, they destroy drug-resistant germs that antibiotics can't touch, they're our only hope against tomorrow's plagues, and one with a Nobel Prize pedigree. Only problem is, they're TOO CHEAP. Keep an open mind until you see the details. This is a real health scandal. You'll be stunned. Yours FREE if you sign up right now.
